

EARLY DETECTION SAVES LIVES

Mammography Screening Day | Saturday, October 21 | 8 am to Noon

While mammograms do not prevent breast cancer, they can save lives by detecting breast cancer as early as possible.

Experts recommend women over age 40 get regular screening mammograms.

If you're age 40 or over and haven't been screened recently, we're offering appointments on Saturday, Oct. 21, at the following Munson Healthcare locations:

- Cadillac Hospital
- Charlevoix Hospital
- Grayling Hospital
- OMH Medical Group - Indian River
- Kalkaska Memorial Health Center
- Manistee Hospital
- Munson Medical Center's Smith Family Breast Health Center in Traverse City
- Otsego Memorial Hospital in Gaylord
- Paul Oliver Memorial Hospital in Frankfort

Appointment times are also available Monday - Friday at all Munson Healthcare screening locations.

Contact your primary care provider to obtain an order for your mammogram. Visit munsonhealthcare.org/pink for scheduling information. If you don't have a provider, please call Munson Healthcare Find-A-Doctor at **231-935-5886** for help finding one nearby.

MUNSON HEALTHCARE
Regional Cancer Network

Most insurance plans, including Medicare and Medicaid cover mammography screening. If you do not have insurance, please call **231-935-7422** and financial counselors can assist you.
